25 X 1	*	Comment. It is unli	ikely that new combat	troops should be
		stationed in the already	overpopulated uranium	mining area. The
		Internate in paragraph 3,	which are reported f	or the first time,
.5X1		may have been built to que from the population. This	arter hub or poviet i s hypothesis is stren	abor units isolated withered by the facts
		that such buildings are so	cattered over the ura	nium mining area.
		Their location probably de	epends on the location	n of uranium plants.
25X1		They do not include outbut	mornes capable of an	eftering heavy weapon
